

***COMPONENTS***

***WORKING WITH YOU!***

# ***YOUR BEST SOURCE FOR METAL BUILDING AND ARCHITECTURAL COMPONENTS***

**Foremost** offers a huge selection of metal building and architectural component products for your new building, retrofit or repair projects. In addition to supplying **component parts from your list**, we offer more than the typical component supplier does. We will do **takeoffs and generate the bill of materials** rather than expecting you to do it. We will work with you to select the **best material** to meet your needs whether they are aesthetic or functional. Our volume buying power allows us to provide **value-added** services while maintaining **low prices**.

## ***Component Projects***

When you buy a **component project** from Foremost, in addition to takeoffs and cut lists, we prepare **complete erection drawings**. With this kind of service, you can easily do architectural roofs with hips and valleys, roof retrofit projects and difficult wall and fascia projects, just to name a few. You can feel comfortable in knowing that our **highly qualified and knowledgeable people are accurately taking care of all the details, saving you valuable time** in the office and the field.
