

## Standard Building Features and Benefits

- **Flexible Design** – Provides for virtually unlimited sizes, configurations and uses.
- **Wide Flange Endwalls** – More rigid and much easier to erect than cold formed endwalls
- **Clips Welded to Structure** – Easier to install purlins and girts than if using loose clips.
- **Roof and Wall Fasteners 1 ½” Long** – For ease of installation of roof and wall panels over 6” insulation.
- **Long Life Finishes** – 20-Yr. Galvalume material warranty, 20-Yr. silicon polyester or Kynar paint warranties ensure a functional and great looking building well into the future.
- **Long Life Roof Fasteners** – Will not void 20-Yr. material or finish warranties.
- **PBR (Purlin Bearing Leg) Standard Profile Panel** – Helps maintain seal at sidelaps.
- **1” Tape Sealant at Roof Panel Laps** – For positive roof sealing.
- **Ice Gutter Design** – Special design inhibits gutters from being torn off by ice slides.
- **State of the Art Standing Seam Roofs** – Standing seams provide additional weather resistance for low slope and wider roofs, allow for expansion and contraction without detriment and improve thermal efficiency.
- **Numerous Panel Types, Profiles and Colors** – For solutions to utilitarian, architectural or energy efficiency needs.
- **Green Options** – High efficiency insulation options, plus insulated panels and optional cool roof colors provide value and energy savings.
